

Y-Age Glutathione Patch

If you have been diagnosed with an under or overactive thyroid, then the Y-Age Glutathione patch is an easy way to support this essential gland to repair and function optimally.

How Do These Patches Work?

Your body emits heat, including heat in the infrared spectrum. The Y-Age Glutathione patch is designed to trap this infrared energy when placed on the body, which causes it to reflect it back to stimulate specific points on the skin that can promote repair on a cellular level.

Think of these patches like solar panels for your body.

One sleeve of Y-Age Glutathione patches contain 30 patches total. This is a 30 day supply to be used 12 hours on and 12 hours off.

Suggested length of time to use the Energy Enhancer Patches is one to three months for optimal benefits. One month is equal to two sleeves of patches. If you purchase three sleeves at a time, you will receive the lowest price per sleeve.

Make sure you are well hydrated and have enough minerals in your diet or supplement schedule to optimize the bioelectrical conductivity of these patches.
